SUMMARY

A dedicated and enthusiastic engineering student pursuing B.E. in Computer Science and Engineering (Artificial Intelligence and Machine Learning). I am passionate about building real-world solutions using smart technologies and enjoy working on both software and embedded systems. A strong academic foundation (CGPA: 8.28) and certifications from NPTEL in Python and Design Thinking. I am also an active problem solver with 280+ problems solved on LeetCode (1400+ rating) and 500+ on CodeChef (1200+ rating), constantly improving my algorithmic thinking and coding skills. I aim to leverage my skills in AI/ML, web development, and analytics to contribute meaningfully to innovative tech solutions.

TECHNICAL SKILLS

Language : Python , C Programming , C++ , Java

Web Technology : HTML , CSS , Basic JS , SQL , React

Framework : Tensorflow , Bootstrap , Tailwind

Tools : Git , Github , Colab , PowerBi , Figma

ACHIEVEMENTS

LeetCode: 280+ problems solved, 1400+ Contest Rating

CodeChef: 500+ problems solved, 1200+ Rating

Selected for HackHub'25 - a national-level hackathon at VIT Chennai

PROJECTS

- **Smart Offline AI Voice-Enabled Water Detection System.**
 - A unique hardware-software integrated solution using ESP32 and offline voice recognition to detect water presence and respond to voice commands without internet dependency.
- **ToyMark E-Commerce Website.**
 - A colorful, user-friendly online toy shopping site built using HTML, CSS, JS, and Bootstrap. Features product categories, search/filter options, and a functional checkout interface.
- **Power BI Student Course & Fees Dashboard.**
 - A dynamic data visualization project that presents course-wise student enrollment and fee details through interactive Power BI dashboards, enabling data-driven academic planning.
- **Real vs AI Generated Image Detection.**
 - The AI vs Real Image Detector is a machine learning project designed to distinguish between real human faces and AI-generated (deepfake/synthetic) images. This project uses deep learning with PyTorch to build a classifier that automatically analyzes and predicts whether an input image is real or AI-generated.

EXPERIENCE

Frontend internship - Learn Logicify

- Learned HTML, CSS, JavaScript and built a responsive personal portfolio site.
- Explored AI tools to enhance development workflow.

CERTIFICATIONS

- NPTEL : Joy of Computing using Python - (Elite)
- NPTEL : Design Thinking as A Primer
- COURSERA : Introduction in Machine Learning
